

## Deepnet SafeID 100

oath Compliant

Deepnet SafeID 100 is a compact security device that generates one-time passwords (OTP) with a single press on a button. It enables the users to logon to secure applications safely and securely, such as LAN network access, VPN remote access, Web online access and mobile applications.

Deepnet SafeID 100 is a **“green”**, life-time security token. Unlike other conventional security tokens that often expire in 3 to 5 years, Deepnet SafeID 100 **never expires** as it is powered by a **renewable battery**, offering a very high return of investment.

### Key Features

- ◆ One-button operation
- ◆ Power level indicator
- ◆ Automatic power-off
- ◆ Renewable battery
- ◆ Strong two-factor authentication
- ◆ Eliminate the risk of password theft
- ◆ “Out-of-the-box” solutions
- ◆ Runs on RADIUS clients for remote VPN access
- ◆ Runs on Windows GINA for network access
- ◆ HTTP authentication for web logon
- ◆ LDAP and Active Directory database support
- ◆ Easy to integrate into your existing environment

### Technical Specification

<b>Algorithm:</b>	OATH Compliant Event Based
<b>Firmware:</b>	ROHS Compliant
<b>Dimensions:</b>	54 x 28 x 15 mm
<b>Weight:</b>	18g
<b>LCD:</b>	8 character numerical LCD
<b>Battery:</b>	Standard Lithium Battery
<b>Battery Life:</b>	3-5 Years (15,000 clicks) Replaceable
<b>Operating Temperature:</b>	0°C - 50°C
<b>Storage Temperature:</b>	-20°C - 70°C
